About Detailing Devils

who we are?

About... Detailing Devils

Who we are?

A one stop **car care solution** providing exclusive range of cutting-edge car beauty products and **World class Nano Coatings & Paint Protection Film (PPF)**. Thorough research and understanding the needs of a true automotive enthusiast resulted in the establishment of **Detailing Devils Pte Ltd., Singapore**. Detailing Devils is a leading automotive detailing company. For years it has worked on multifunctional protective coatings for automotive surface, reinventing the ways to wash, clean, detail and coat a vehicle with extreme care and cutting edge technology Nano compound (Nano ceramic). Through diligent efforts, continuous research and testing it has developed **10H DNA**, a Nano ceramic coating, which successfully protects surfaces like vehicle paint, fabric, leather, glass, plastic, and rubber. Since its beginning (**2017**), Detailing Devils has always offered only the best with their products & services while striving to constantly improve it.

Why us?

Detailing Devils is India's leading car detailing services and nano ceramic coating services brand that makes a vehicle look superb through its premium range of products and services. It was brought to India from Singapore in 2016 by

an automobile fanatic with a vision to shine and protect the maximum number of vehicles possible. We have established ourselves firmly in the industry and expanded to **73+ studios** all over India and the world.

What we do?

We specialize in Washing, Detailing, and Car & Bike coating for vehicles such as 'Skin Restoration Service' (SRS), 9H DNA Absolute Nano Ceramic Coating, 10H DNA Graphene, Paint Protection Film, to name a few.

How we do it?

We make use of the latest and the most advanced technology in the automotive detailing industry as well as high-quality an environment -friendly products to give a superior look to a vehicle.

More importantly, our staff is passionate about their job and highly motivated to make you feel great about your ride.

Important Features

of Detailing Devils Products

EXTRA PROTECTION

All Detailing Devils products provides a vehicle an additional layer of protection against various external elements. They protect the vehicle's surface from even the UV rays that can cause a vehicle's paint to fade over time.

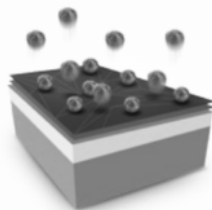

LOOK NEW FOR LONG

Our coatings give the showroom shine to a vehicle as well as the ease to maintain it. They enhance your riding joy as well as its resale value if you wish to sell it in the future.

EASIER TO CLEAN

Sure a vehicle needs to be cleaned regularly to keep it in top-notch condition but our products have such a repelling power that it becomes quite easier to do so. After our coatings have been applied, dirt and other substances aren't able to bond with a vehicle's surface and let it look neat and clean.

MORE DURABILITY

Our products make a vehicle and its paint much more durable. A car's paint lasts much longer and also becomes easier to care for. The vehicle is also protected against physical hazards such as minor scratches, small rocks, debris etc.

Dragon
PPF

Dragon Paint Protection Film is the **superior way to protect and enhance** your vehicle, with a proprietary formula that provides unmatched protection from extreme temperatures, **UV rays** and other environmental factors. Dragon PPF is the **world's first** paint protection film with an industry-leading **multilayer TPU structure** that stretches to accommodate intricate lines, making it possible to protect the paint at tight spots as well. At the **same time**, this technology provides a **better effect** and **greater protection** for the vehicle compared to other systems in the market.

Even the powerful needs Dragon's Protection

Dragon Paint protection film also has a proprietary **D.N.A.™ hydrophobic** protection that repels liquids and reduces water marks, keeping your car looking pristine and beautiful. The product is scientifically formulated to help protect automotive finishes, using the same **DNA™ technology** found in **Detailing Devil's Coats**.

Dragon Paint Protection Film is the most advanced, professional and **cost-effective** film in the market. Dragon's unique **nano-coating** technology creates a **unique look** that stands out from the rest, while providing **unparalleled protection** for your vehicle.

PROTECTION X APPEALING

SELF HEAL PROTECTION

An advanced **self-healing** layer with a heat **activation** that renews the film back to its original state. **Never** worry about minor **scratches** again.

SOLVENT PROTECTION

Resistant to solvents and **alcohol-based liquids**, designed to guard a vehicle's paintwork from damage caused by corrosive substances.

STAIN PROTECTION

Protects your paint **from the splats of insects, bird droppings, tree sap** that cause damage to your car.

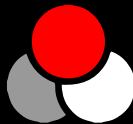

D.N.A HYDROPHOBIC APPEAL

Proprietary advanced technology help **protect** your car **from Liquid Damage** with technology proven to repel liquids, keeping the car cleaner for a **longer period** of time.

MIRROR FINISH APPEAL

Superior optical clarity of the film intensifies original paintwork, creating a **mirror-like shine**.

COLOUR RETENTION APPEAL

Formulated for **excellent UV, heat** and **water resistance** to preserve paintwork. Its UV resistant so **it won't yellow over time**.

PERFORMANCE

Dragon PPF

DRAGON PPF PERFORMANCE

Dragon PPF Performance is a "State of The Art" automotive paint protection film. It's among the finest paint protection films available, with exceptional coating technologies. The multi-layer films have been engineered to ensure outstanding installation handling, optical clarity and long term durable properties and also comes along with 7 year warranty.

Dragon PPF Performance offers the ultimate paint protection by offering poly-phenyl-fluorethylene technology. This unique liquid quencher film is self-healing and has some interesting properties of hydrophobic and anti-corrosive. It provides unparalleled clarity that promises to protect your car's original color and low yellowing paint work resulting in an unparalleled level of UV protection, keeping your automobiles looking as fresh and new as the day they were first painted.

DNA GRAPHENE

The Devils are taking their automobile protective coating game to the next level with **DNA Graphene Coating**. Unlike any other coating product in the market currently, this brand new coating has **10H Hardness** and outshines its predecessor significantly.

DNA Graphene creates a superb and **ultra-flexible coating** that can be applied to almost every surface that exists. It's versatile, one-size-fits-all, and uses the latest nano-technology to give your car great results for the years to come.

SPECIFICATIONS

Surface Type	: Automotive Paint
Durability	: 6 year
Coating Thickness	: 700-1000 nm
Temperature Durability	: 150° C
Chemical Resistance	: 12>pH>1
Curing Period	: Overall 48 Hours

MORE THAN 80% HYDROPHOBIC EFFECT

A huge advantage of this product is its outstanding hydrophobic effect and durability. Long term tests in real life conditions have shown durability over 12 months with a hydrophobic effect exceeding 80% of the outcomes just after the coating.

LONGER DURABILITY

Our graphene coating is much sturdier and more effective than ceramic coating and other graphene coatings in the market. It is thin, lightweight, and offers an unsurpassable and glossy finish to the vehicle for a long period of time.

Brand New Innovation

The DNA Graphene utilizes the latest nano-technology to give your vehicle 6+ years of high-quality protection.

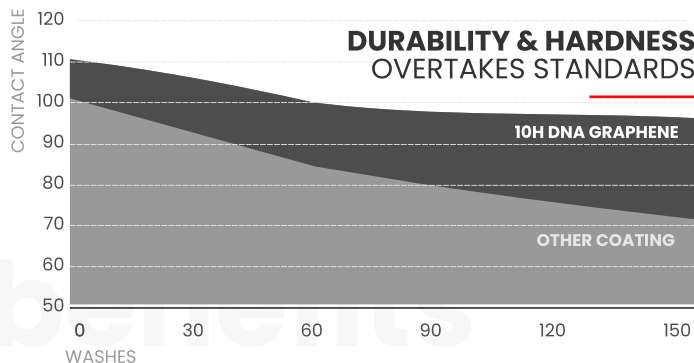

10H Hardness

It is a coating that lasts for a long time, thanks to its 10H Hardness feature.

Ultra-High Gloss & Depth of Colour

It gives a rich, attractive, and deep gloss to the vehicle's surface that takes the elegance and appearance of a vehicle to another level.

CRYSTAL VISION

Crystal Vision is one of our most reliable and advanced car coatings specifically developed for windshields.

It's excellent hydrophobic feature and water-beading effect makes water form tiny beads and slide down the surface and leave it completely dry. Hence, better vision while driving in rains. The anti-glare feature of this coat promotes **better night vision**.

This coating adds thickness to the surface and prevents it from breaking off easily. In addition to this, the superb oleophobic feature prevents the windshields from surface harms like **bird-poops, tree sap**, etc.

WVA

WHEEL... NANO ARMOR

Wheel Nano Armor is the best protection coat developed for all types of wheels specially alloys which has been formulated to withstand heat created by the braking system of vehicles.

In addition to that, it protects wheels against dirt, mud and sludge, with a highly durable protection coat that prevents them against oxidation and harmful UV rays while making their surface resistant to splashes of muddy, dirty water and thus, helps them with keeping up their shine and a spot-free finish.

It forms an outstanding rather permanent chemical bonding with the surface of wheels and gives them an excellent stain & contaminant-resistant ability.

SA

NANO... SHINE ARMOR

Nano Shine Armor is a revolutionary tyre coating that has been specifically developed to restore the black shine of tyres.

Unlike waxes and polishes, it is non-oily, non-greasy, environmentally-safe and silicone free tyre coating with properties like mud-repellence and permanent adhesion.

Silicone based coatings are quite destructive as they promote tyre yellowing, cracking and can destroy the UV protectants that are essential to the life, color, and texture of a tyre. **Nano Shine Armor** doesn't wear off easily and gives tyres a highly durable and protective coating that protects them from yellowing, fading and cracking over a period of time and helps in maintaining their spotless black shine.

TA

NANO... TRIM ARMOR

Nano Trim Armor is a special water based nano tech coating used to bring back life to faded interiors.

Environmental elements and prolonged use can damage any vehicle affecting dash trim, and other interior parts like wood panels, doors, etc. and forms permanent adhesion with the surface applied on so that it doesn't fade or lose their shine. Usually, silicone products add temporary shine and do not offer any longtime solution. Moreover, silicone oils have been known to dry out the applied areas creating a bigger problem of leaving a greasy residue even after buffing.

Nano Trim Armor makes sure to overcome all these shortcomings and give car interiors a permanent protective coating.

FABRIC

FABRIC... NANO ARMOR

Fabric Nano Armor is an industrial nano coat which has been specifically formulated to protect car's textile surfaces from fading, stains, water or any other impurities.

The oleophobic feature of **Fabric Nano Armor** protects fabrics from water and oil based stains. It also makes them more breathable and extremely durable due to anti-fouling ability.

In addition to that, it makes ordinary fabrics waterproof and easy to clean. Not just protection, it also gives the interiors a pleasant fragrance.

DETAILING... SRS

Skin Restoration System

Skin Restoration System (SRS) is a detailed paint correction and restoration process that has been developed to eradicate stubborn impure contaminants from vehicle's surface and help restore its factory finish and appearance through a step by step process.

It is a **5 step process** under which we target surface level harm like scratches, swirl marks and clear coat haze or those scratches that have gone through the painted surface. After undergoing skin restoration process, cars exhibit a fine, sleek and smooth finish and can further undergo protective coating process.

Dragon
PPF

Introducing a new innovative hybrid wrapping film: Dragon Tint. This is a special colour wrapping film with the finest rich colour pigment and excellent high gloss & matte finishes. It gives your vehicle an OEM paint like finish while protecting it from harmful daily elements.

Our line of Dragon Tint films have been developed to give your vehicle a beautiful and protective finish that is comparable to factory OEM paint. Dragon Tint films come in multiple shades and can be applied over any colour paint so you can create your own unique look.

Collaboration

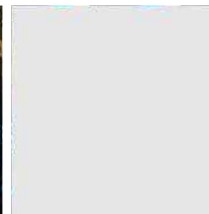

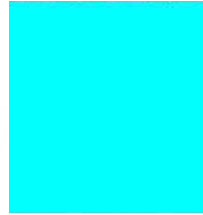

Electroluminescent

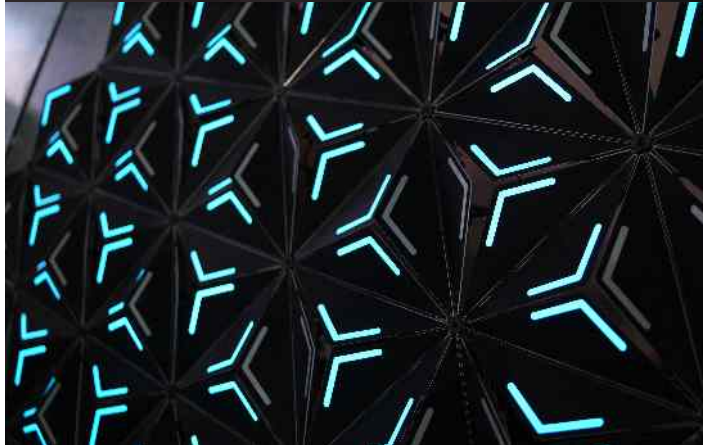

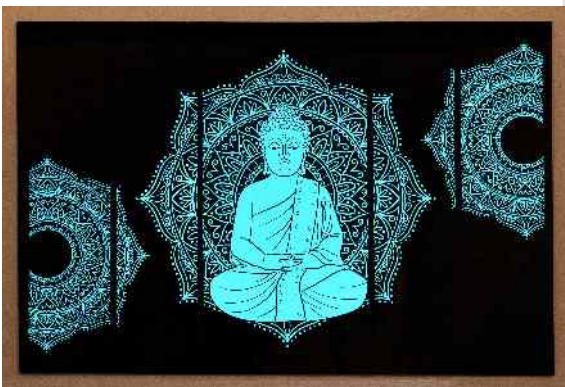

Lumilor®

Lumilor is World's 1st four layer Light Emitting Coating (LEC) system which allows anything coated with it to illuminate. Lumilor is applied using a professional high volume / low pressure (HVLP) paint system. The skills needed to apply Lumilor are similar to the skills needed to apply other professional grade coatings with an HVLP system.

It's four layer coating system includes unique processes and specifications. Three to five hours is needed to apply all of the layers of Lumilor in standard conditions. Lumilor should be applied in an ambient temperature of at least 70 degrees Fahrenheit.

Lumilor is available in eight native colors, these are colors you see when Lumilor is lit. Aqua, Blue, Green, Yellow, Orange, White, Pink & Violet. Lumilor appears as a gray hue, similar to an automotive primer, when unlit. Topcoats (Airbrushing, Tinted clear coats, Colored top coats, Hydrographics, etc.) can be used to alter the appearance of Lumilor to create a desired effect.
